I fully support satellite radio and its right to broadcast anything it wants. If conventional radio and TV stations feel threatened by satellite radio, there must be a good reason for it; could it be that people are sick of hearing their crap. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support satellite radio. I purchased a satellite radio and pay for it's broadcast because I wanted to and I don't want radio and TV companies telling me what I can and cannot listen to.
